

Custom Made Steel Cable Drag Chain Cable Carrier 47mm 58mm 68mm Inner Height For Machine Tool

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: BNEE
- Certification: CE IS09001
- Model Number: TL TLG
- Minimum Order Quantity: 1
- Price: 10\$-60\$
- Packaging Details: cardboard box
- Delivery Time: 5-8 work day
- Payment Terms: T/T
- Supply Ability: 200 metres per day

Product Specification

- Material: Steel
- Inner Height: 10mm-172mm
- Inner Width: Customized
- Radius: 18-250
- Outer Height: 25mm-220mm
- Outer Width: Customized
- Bending Radius: 50mm-1000mm
- Highlight: **custom steel cable drag chain,
47mm steel cable drag chain,
Machine Tool Steel Cable Drag Chain**

Product Description

Steel Cable Drag Chains: The Backbone of Industrial Cable Management

Introduction: Steel cable drag chains, often referred to as steel cable carriers, are pivotal components in the realm of industrial cable management. Known for their robust construction and versatility, these chains provide a reliable means of protecting and managing cables and hoses in a variety of dynamic applications.

Application Range: The application range of steel cable drag chains is expansive, covering a spectrum of industries:

Automotive Manufacturing: They are integral to the protection of cables in robotic arms and automated assembly lines within the automotive sector.

Heavy Machinery: Steel drag chains are used in construction, mining, and agricultural machinery to safeguard cables from the harsh conditions and heavy usage.

Machine Tools: CNC machines, milling machines, and other precision tools rely on steel drag chains to ensure the safe and efficient movement of cables and hoses.

Industrial Automation: Automated production lines and robotic systems utilize these chains for managing cables in a reliable and organized manner.

Material Handling: Conveyor systems and other material handling equipment often depend on steel drag chains to protect the cables that drive their operation.

Characteristics: Steel cable drag chains are characterized by a set of features that make them suitable for a wide range of applications:

Durability: Constructed from high-strength steel, these chains are designed to withstand the rigors of continuous use and heavy loads.

Resistance to Wear: The steel material provides excellent resistance to abrasion, ensuring the chains maintain their integrity even in abrasive environments.

Temperature Tolerance: Steel is capable of withstanding a wide range of temperatures, making the drag chains suitable for both hot and cold environments.

Customizability: Steel cable drag chains can be customized in terms of size, shape, and internal configuration to fit specific machinery and application requirements.

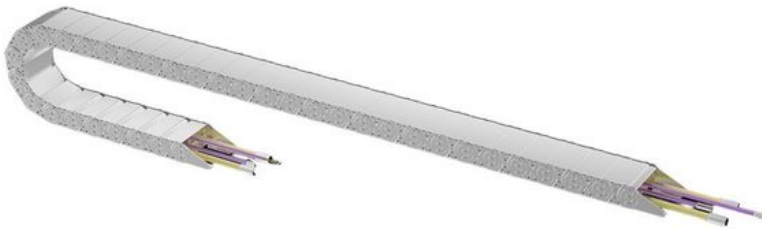

Noise Reduction: The enclosed design of the chains helps to reduce noise generated by loose cables during operation.

Safety: By keeping cables organized and protected, steel drag chains contribute to a safer working environment by reducing the risk of accidents.

Maintenance: Steel chains are relatively low-maintenance, requiring only periodic inspection and cleaning to ensure optimal performance.

Conclusion: Steel cable drag chains are a cornerstone in the field of industrial cable management, offering a combination of durability, protection, and adaptability. Their extensive application range and distinctive characteristics make them an essential component in many industries where the reliable movement and protection of cables are critical. As technology continues to evolve, the demand for robust and reliable cable management solutions like steel cable drag chains will persist, underscoring their importance in modern industrial operations.

Type	inner height(mm)	outer height(mm)	pitch(mm)
TL30	10	25	30
TL45	16	32	45
TL65	24	44	65
TL80	32	56	80
TL95	47	70	95
TL115	58	86	115
TL125	68	100	125
TL155	86	120	155
TL180	112	144	180
TL225	154	200	225
TL250	172	220	250
