

Heavy Duty Steel Cable Carriers For Harsh Environments

Our Product Introduction

For more products please visit us on flexiblecablecarrier.com

Basic Information

- Place of Origin: Cangzhou Hebei
- Brand Name: BNEE
- Certification: CE & ISO
- Minimum Order Quantity: 1
- Price: Negotiable
- Packaging Details: Wooden packing
- Delivery Time: 7~15 working days
- Payment Terms: L/C, D/A, T/T, Western Union

Product Specification

- Material: Plastic
- Color: Black
- Load Capacity: Medium
- Inner Diameter: 35mm*125mm
- After Warranty Service: Video Technical Support
- Function: Machine Tool Accessories
- Application: Industrial Machinery
- Outer Width: 10mm-364mm
- Highlight: **Heavy Duty Steel Cable Carriers,
Harsh Environments Steel Cable Carriers**

Product Description

Product Description:

A cable drag chain, also known as a steel cable drag chain, is an essential component in various machinery and equipment, particularly in the industrial sector. This product is designed to protect and guide cables and hoses, ensuring smooth operation and longevity of the machinery.

The Cable Drag Chain features a height of 10mm, providing ample space to accommodate different sizes of cables and hoses. Its outer width ranges from 10mm to 364mm, offering flexibility to suit various machinery requirements.

Available in a classic black color, the Cable Drag Chain not only serves a functional purpose but also adds a sleek and professional look to the machinery. The black color blends well with most equipment designs, maintaining a cohesive aesthetic appeal.

Functioning as machine tool accessories, the Cable Drag Chain plays a crucial role in ensuring the efficient and safe operation of machinery. By securely holding and guiding cables and hoses, it prevents tangling, twisting, and damage, thereby improving overall productivity and reducing maintenance costs.

With a working temperature ranging from -40°C to +110°C, the Cable Drag Chain is built to withstand extreme temperature conditions.

This durability ensures reliable performance even in harsh environments, making it suitable for a wide range of industrial applications.

Features:

Product Name: Cable Drag Chain-----

After Warranty Service: Video Technical Support

Outer Width: 10mm-364mm

Function: Machine Tool Accessories

Color: Black

Working Temperature: -40°C to +110°C

Technical Parameters:

Temperature Range-----	40C-130C-----
Mode	TLG 100
Length	1 Meter
Material	Plastic
Outer Width	10mm-364mm
Color	Black
Structure	Bridge Type
Height	10 Mm
Outer Diameter	45mmx43mm
Inner Diameter	35mm*125mm

Applications:

BNEE Cable Drag Chain, originating from Cangzhou, Hebei, is a versatile solution designed for a variety of industrial machinery applications. One of the key models, TLG 100, offers a wide range of outer widths from 10mm to 364mm, catering to different cable sizes and quantities.

The plastic cable chain is a standout feature of the BNEE product, providing a durable and flexible enclosure for cables in industrial settings. Whether used in CNC machines or other heavy-duty equipment, the cable drag chain ensures the safe and efficient movement of cables, preventing tangling and damage.

With a temperature range spanning from 40°C to 130°C, the BNEE cable drag chain can withstand harsh environmental conditions, making it suitable for a diverse range of industrial applications. The steel cable drag chain construction adds an extra layer of protection and durability, ensuring reliable performance over an extended period.

When considering scenarios for the BNEE Cable Drag Chain, imagine a bustling manufacturing facility where CNC machines operate continuously. The cable drag chains efficiently manage the cables, allowing for smooth movements without the risk of entanglement. In this high-temperature environment, the BNEE cable drag chain maintains its integrity, providing a reliable solution for cable management. Another common application scenario for the BNEE Cable Drag Chain is in automated assembly lines where precision and reliability are paramount. The cable drag chain's design, with a height of 10mm, ensures compatibility with various machinery setups, offering a neat and organized cable management solution.

In summary, the BNEE Cable Drag Chain is a versatile and robust product suitable for a wide range of industrial machinery applications. Whether you need to manage cables in CNC machines or other industrial equipment, the BNEE cable drag chain with its plastic and steel components offers durability, flexibility, and reliability in challenging operating conditions.

Support and Services:

Our Cable Drag Chain product comes with comprehensive Product Technical Support and Services to ensure that our customers have a

smooth experience. Our technical support team is available to assist with any product-related queries, troubleshooting, and assistance in selecting the right cable drag chain for your specific needs. Additionally, our services include installation guidance, maintenance tips, and product training to help customers maximize the performance and lifespan of their cable drag chains. We are committed to providing excellent customer support to guarantee satisfaction with our product.

Packing and Shipping:

Product Packaging for Cable Drag Chain: -----
The Cable Drag Chain will be securely packed in a sturdy cardboard box with protective foam padding to prevent any damage during transit.
Shipping Information:
Once the order is confirmed, the Cable Drag Chain will be carefully packaged and shipped via a reliable courier service. Customers will receive a tracking number to monitor the status of their delivery.
